Participated in the solana hackathon and placed second.

OBJECTIVE

Innovative and value-driven front-end developer with two years of experience in building scalable, user-friendly online applications using Angular and React. Proficient in writing clean and maintainable code, as well as troubleshooting and debugging complex issues. Committed to delivering exceptional user experience and consistently meeting project deadlines, with a proven track record of providing value to customers. Looking to leverage my skills and expertise to create cutting-edge digital solutions that drive business growth and customer satisfaction.

EMPLOYMENT HISTORY

Frontend developer, Detasec Technologies Private Limited. Feb 2021

With 2.2 years of professional experience in web design, development, and deployment, I bring a solid foundation in Angular, React, and Figma to the table. I have a proven track record of success in creating intuitive, engaging web applications that meet and exceed client expectations. Additionally, I possess strong knowledge and experience in utilising version control systems such as GitHub and GitLab to streamline project management and ensure smooth delivery of high-quality products. Looking forward to applying my expertise to new and exciting challenges in the field.

Roles And Responsibilities

- Designed and modified UI/UX flows, Integrated APIs, Developed Ui, and Fixed bugs.
- Utilised best practices for front-end development to write clean and maintainable code.
- Developed and maintained web applications using Angular, React.js and Next.js.
- Responsible for handling the entire application life cycle, from creating a project in Git and Developing and Deploying it on the server.
- Troubleshooting and debugging complex issues to ensure a seamless user experience.
- Demonstrated ability to work independently and as part of a team in a clickup environment.
- Successfully met project deadlines and delivered value to customers.
- Continued to stay updated on emerging technologies and techniques in front-end development.
- Changes made to an existing WordPress website and Next.js.
- Designed a few websites before developing them using Figma.
- Integrated Web3 Auth Login.
